Subject: React Native App Merge – Proposal

Hi Reema,

I'm Fazil Yousafzai, a beginner React Native developer with experience in both frontend and backend (Node.js, MongoDB). I'd love to help you merge your Seller and Buyer apps into one seamless application.

✅ I can:

- Merge both codebases cleanly
- Create a unified login screen
- Build and connect required APIs
- Ensure smooth UI/UX for both user types

I'm currently building my portfolio, so I'm happy to work at a low rate or even free for this task in exchange for experience.

## My Proposal:

## Types of projects you bid on:

We've recently placed bids on **React Native projects** involving:

- ◆ **Feature enhancements & bug fixes** – Improving video resume workflows, fixing profile linking issues, search bugs, and UI consistency.
- ◆ **Free beginner contributions** – Offering frontend support for startups and small teams in exchange for hands-on experience.
- ◆ **App merging & login system setup** – Unifying separate apps (Seller & Buyer or Employer & Candidate) with integrated login and API workflows.
- ◆ **Frontend development support** – Assisting with responsive UI builds, GraphQL integration, and payment method setups like Stripe/PayPal.
- ◆ **Remote job proposals** – Applying to full-stack/frontend/react native remote roles with willingness to learn, grow, and contribute without pay initially.

## Response rate:

I have not received any response till now.

**What worked well in your bidding approach:**

For now, nothing has worked as I didn't see any response from the clients.

**What needs improvement:**

I will try to reach out to people on LinkedIn to see if anything works for me or not.

**Adjustments for tomorrow's bidding strategy:**

This is it for A3 - I will keep trying and will make a document if anything worked in the future!
